

Horizontal Split Casing Pump

Type CSA/CNA

APPLICATIONS

- Water supply
- Hot and cold water circulation
- For cooling tower
- Irrigation
- Industrial use
- Drainage
- Sprinkling
- Air-conditioning
- For swimming pool

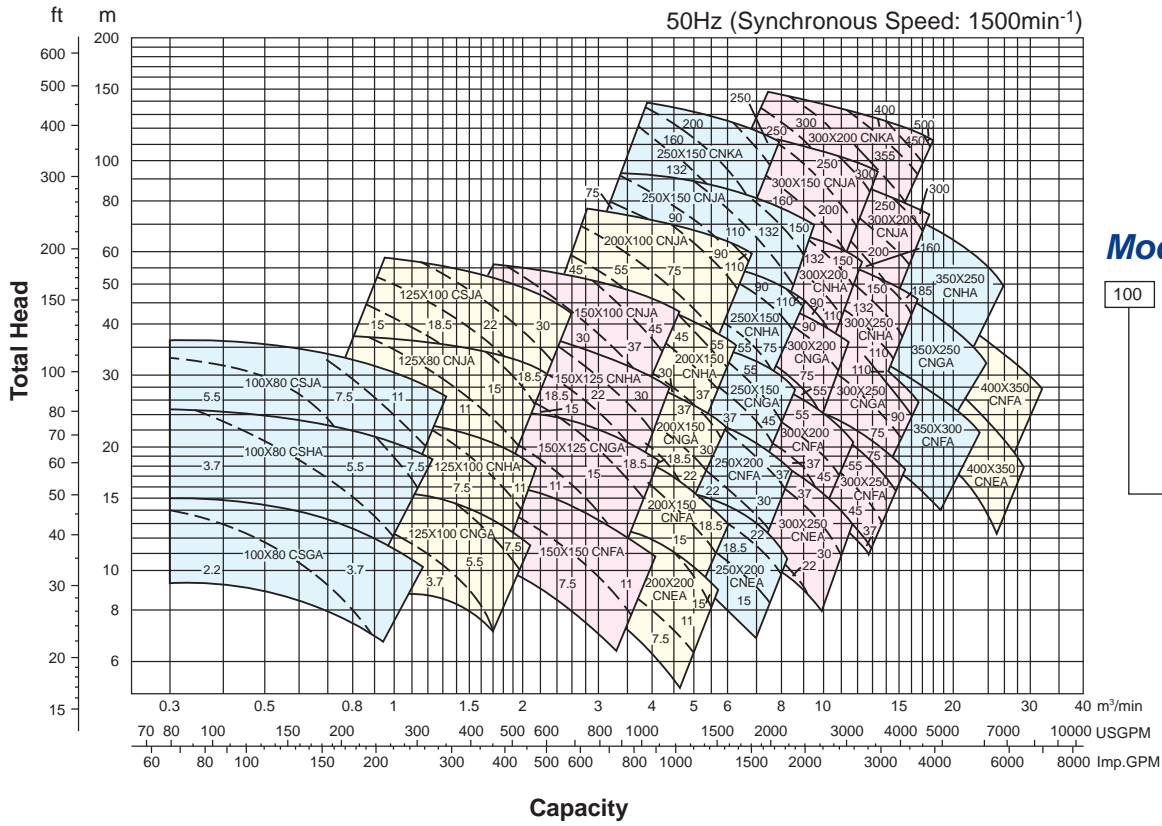

FEATURES

- Very compact design for easy installation and permits minimum maintenance.
- Axially split casing allows the easy removal of the top casing for inspection and service.
- A wider range of performance with head up to 150m.
- High speed drives and vertical mount available.
- Anti-corrosion materials used on the rotating parts.
- High quality sealed and cartridge type bearing units provide high durability.
- High allowable working pressure can ensure stable running.
- Mechanical seal for easy maintenance.

PERFORMANCE CHART

4 Poles

2 Poles

SPECIFICATIONS

Description		Standard	Optional	
Model		CSA/CNA		
Liquid handled	Type of liquid	Clean water, industrial water, river water		
	Temperatures	Below 80°C (176°F)	81°C-120°C (177°F-248°F) (only applicable for Mechanical Seal Models)	
Max. Working Pressure		16 bar (16.3kgf/cm ²)		
Construction	Shaft Seal	Mechanical Seal	Gland Packing	
	Bearing	Ball Bearing		
	Lubrication	Grease		
Material	Casing	Cast Iron	Ductile Cast Iron (FCD)	
	Impeller	Bronze (except 300 x 200 CNKA)		SCS 13, SCS 14
		SCS 13 for 300 x 200 CNKA		
	Shaft	SUS 316	SUS 403	SUS304
	Shaft Sleeve		Bronze	Bronze
Flange	Suction	JIS 16 KRF		
	Discharge	JIS 16 KRF		
Accessories				
Standard		Air vent piping, M. Seal or G. Packing, flushing water piping, Lift bolts Drain piping (only applicable for G. Packing models)		
Option		Common base, Anchor bolts, Shaft coupling, Coupling guard		

SECTIONAL VIEW

Casing

The rotating assembly can be removed without disturbing connected piping as the suction and discharge flanges are integrally casted into the lower casing half. Casing is **high pressure designed** and able to with stand against water surge.

Recirculation

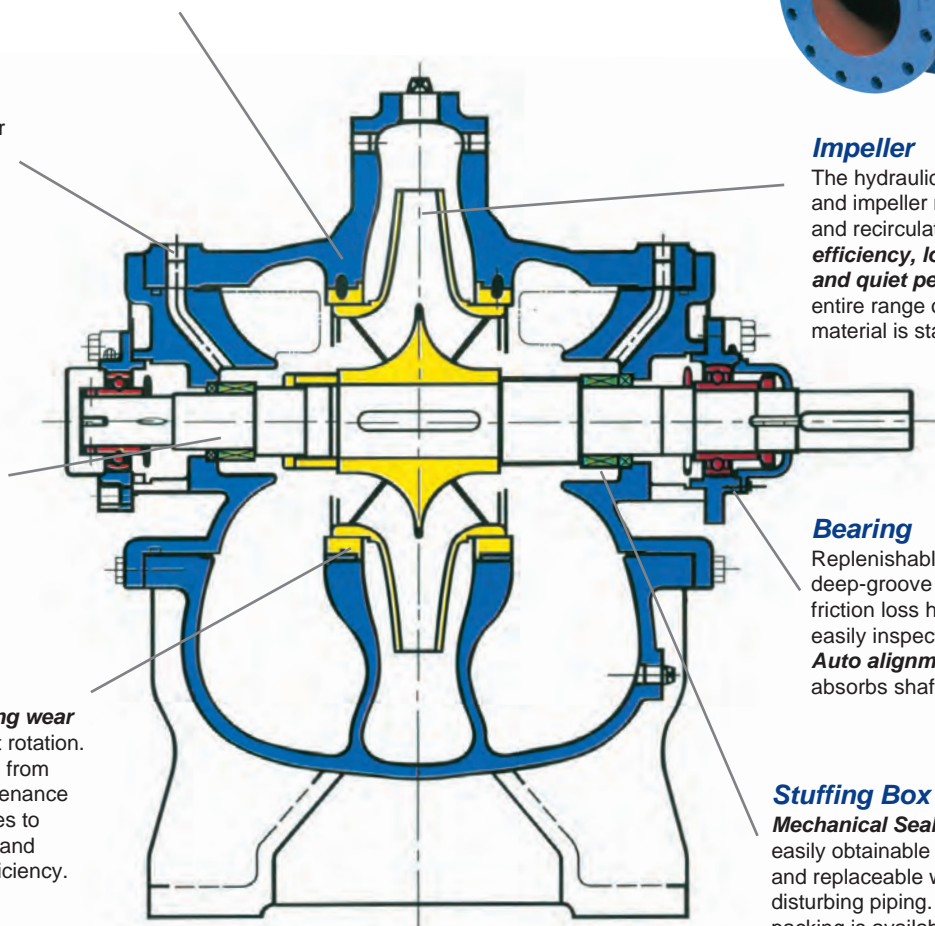

Recirculation pipe lines for self-flushing are provided.

Shaft

Stainless steel material ensures long life against corrosion and wear. Short support span of bearing prolong bearing life.

Casing Wear Ring

Replaceable bronze casing wear rings are locked to prevent rotation. It protects the pump casing from wear, permits simple maintenance of proper running clearances to reduce maintenance costs and enhance high operating efficiency.

Impeller

The hydraulic matching of casing and impeller minimizes axial thrust and recirculation, ensuring **high efficiency, low NPSH required and quiet performance** over the entire range of operation. Bronze material is standard.

Bearing

Replenishable grease lubricated deep-groove bearing units with low friction loss has a **long life** can be easily inspected and replaceable. **Auto alignment structure** absorbs shaft deflection.

Stuffing Box

Mechanical Seal is standard, easily obtainable in the market and replaceable without disturbing piping. Gland packing is available as option.
