

STAINLESS STEEL SEMI-VORTEX SUBMERSIBLE PUMPS

APPLICATIONS

- Liquid transfer in food factory
- Waste water sump in hospital & laboratory
- Waste water sump in factory

FEATURES

- Main component is stainless steel. Rust resistant and capable of withstanding corrosion for light chemical duty.
- Foreign particles 60% - 70% of discharge diameter size can pass through due to semi-vortex impeller.
- Easy maintenance with Quick Discharge Connector is possible as option.
