

4" Peripheral Submersible Electropumps Type ONK

APPLICATIONS

The peripheral submersible electropumps series ONK have been made for lifting and pressurizing clean water on the domestic applications, pressure booster sets and sprinkle irrigation system. They are produced in single-phase and three-phase and they can be used either in 4" well or tanks.

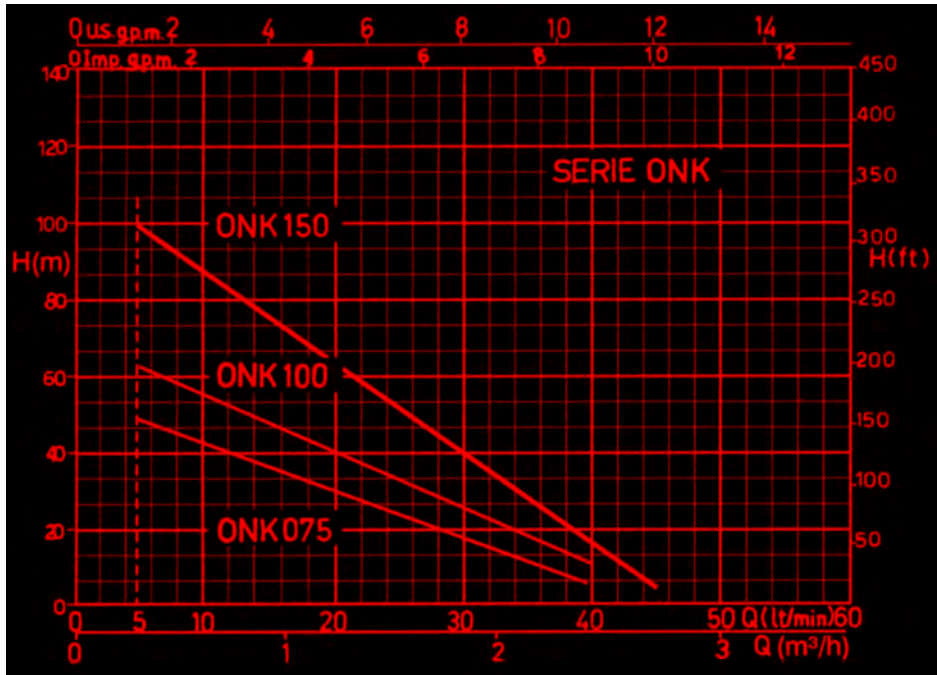

TECHNICAL FEATURES

The motor pump, asynchronous type with oil lubricated rotor, F class winding, IP 58 protection, is made with highly corrosion resistant materials. Frame and shaft are manufactured with inox steel, cast iron motor bracket, pump body and delivery head nickel plated, brass impeller stamped, amply size pressure equalization diaphragm. The single phase type is suitable to work with capacitor permanent. Standard Neoprene lead cable made, 10mt, length and removable system connections.

PERFORMANCE CURVE

The operating graphic are valid a 2900 r.p.m.. Indicated working data are for continuous service at normal water temperature and density 1kg/dmc. The pump test comply with the standard requirements ISO 2548 class C anxe B.

DIMENSION & WEIGHT

Pump type	Version 50Hz	Amp. A	Motor		Q. Capacity									
			HP	KW	l/min m/h	5	10	15	20	25	30	35	40	45
H-Total manometric head in meters.														
ONKM 075	Monofase 220V	4.3	0.75	0.55		45	41	36	31	26	21	16	11	5
ONKT 075	Trifase 380V	1.9												
ONKM 100	Monofase 220V	5.8	1	0.75		63	49	42	37	30	23	16	10	6
ONKT 100	Trifase 380V	2.4
