

VERTICAL MULTI-STAGE VOLUTE PUMP

APPLICATIONS

- Industrial water transport
- City water transport

FEATURES

- High efficiency and over wide range is possible by double volute design.
- Axial thrust received by balance piston.
- Intermediate sleeve bearings are self-lubricated by pumping liquid.

SPECIFICATIONS

Liquid handled		City water , industrial water
Temperature		0~80°C
Density		1000kg/m ³
Construction	Impeller	Closed
	Shaft sealing	Gland packing
	Bearing	Upper sections: Ball bearings (grease sealed) Intermediate and lower sections: Bearing metal (graphite)
Materials	Casing	FC200
	Impeller	CAC406/FC200/SCS13
	Shaft	SUS420J ₁
Flange		JIS10K
